* Numerical value of DNF, DNS, OCS, WD or DSQ is equal to one more than the number of boats racing. A score of S carries no numerical value, but counts towards qualifying.

** These DSQ's are non-discardable.

If any boat in a division receives a score of S, that race will count for that division for purposes of determining the number of races needed to qualify. Thus, the only situation in which the number of races needed to qualify may be affected is "No race."
